## **WHITEPAPER**

# Message From Chief

I am Lintang Sani, born with Cerebral Palsy and life with Cerebral Palsy can be very frustrating, but I never let that get in the way of achieving my academic dreams. I'm graduated from YPAB inclusive high school and now studying law to fight for disability rights.

***“Everyone has the right to get the same education as us regardless of their condition, physical condition, financial, etc. Education and development can change us for the better.”***

## Our Team

# Background

## **Poor People Have Limited Assets and Capabilities**

Poverty is a state of shortages and deprivations. People living in poverty are badly limited by assets and capabilities which restrict their choices and freedoms. With very few assets in the form of land, property, savings, livestock etc they are vulnerable to sudden shocks. Thus, they are always at the risk of being pushed into deeper poverty.

They are also low on human capabilities like health, education, knowledge and skills; social capabilities such as capacity to organize, sense of identity, the ability to mix up with higher classes etc; and also political capabilities like the capacity represent oneself or others, access information, form associations and participate in the local or national political processes. Combined together, all these constraints lead to voicelessness and powerlessness which result in social barriers. These conditions are conducive for sustaining or promoting poverty.

Poverty can be only eliminated effectively if people are seen and dealt with as agents of change in their lives. Charities and welfare programs often do more harm than good by making people dependent – which is actually dis-empowering!

Empowerment is needed to break free these limitations and can take many forms depending upon what the people need. Empowerment promotes sustainable development, social cohesion and political stability.

## **How Empowerment of People helps Reduce Poverty**

Empowerment of people, in the sense of enlarging their choices and freedom to act, is much more than a means to achieve other objectives; it is a good in itself, and a desirable goal of development.

In the context of development and poverty, empowerment implies changing the environment around the poor people and helping them build and capitalize on their own attributes. Empowerment can come from a wide variety of activities that affect people's life: from education and health services to legal entitlements such as the right to food and right to information. Any initiative is empowering if it increases development opportunities and improves people's quality of life. Empowered people become agents of change in their own lives and actors of their own development.

### **Empowerment through Education**

This is by far the best strategy particularly when focused on women. Education of girls is known to have an all round impact that goes to the future generation. Being better informed an educated woman is more likely to have smaller families, manage the timing of her pregnancies well and look after her children well. It is rightly said: when you educate a girl you educate the whole family. When gender biases are removed, and given opportunities, she can contribute to the welfare of her family economically also. The tiny Indian state of Kerala offers a great example of the power of women empowerment and people development.

Empowerment takes place in the mindset of people and is a process that takes time. It is far too easy to hand out food packets or medicines and get over with the task of "poverty management" but it is exactly that, poverty management – not eradication. On the other hand, empowerment demands working with and spending time with people; understanding their issues, showing the way out and guiding them to do that.

# Empower & Development

Introducing Empower & Development Organization (Empower Dev), we work to develop well-rounded and self-sufficient young adults orphans & disabled people. We provide hard skills development training and we also develop Marketplace Platform for them.

Empower Dev is the parent of 3 Organization:

## Empower NFT

Empower NFT collaborates with world-class art teachers to support free art courses to unlock youth orphans and the disabled full potential. Empower NFT is currently developing VIRST NFT Marketplace for NFT preloved stuff donation and Arts created by orphans and the disabled Artists.

## Empower Small Business Enterprise

Empower SBE provides orphans and the disabled with the skills, knowledge, and venture capital funding required to become innovative and successful Tech Entrepreneurs. Two types of businesses would be sponsored blockchain startups and game developers.

## Empower Investing

Empower Investing provide orphans and the disabled with the skills to evaluate fundamental analysis, working trading techniques & strategies, algorithmic cryptocurrency trading and how to do proper research to find the best coins to invest in

# Co-Partnership Framework

**Empower NFT**

Education Foundation  
Co-Partnership.

Training Provider

**DOMĚSTIKA**

**Empower Small  
Business Enterprise**

Training Provider

**Harvard Business  
School Online**

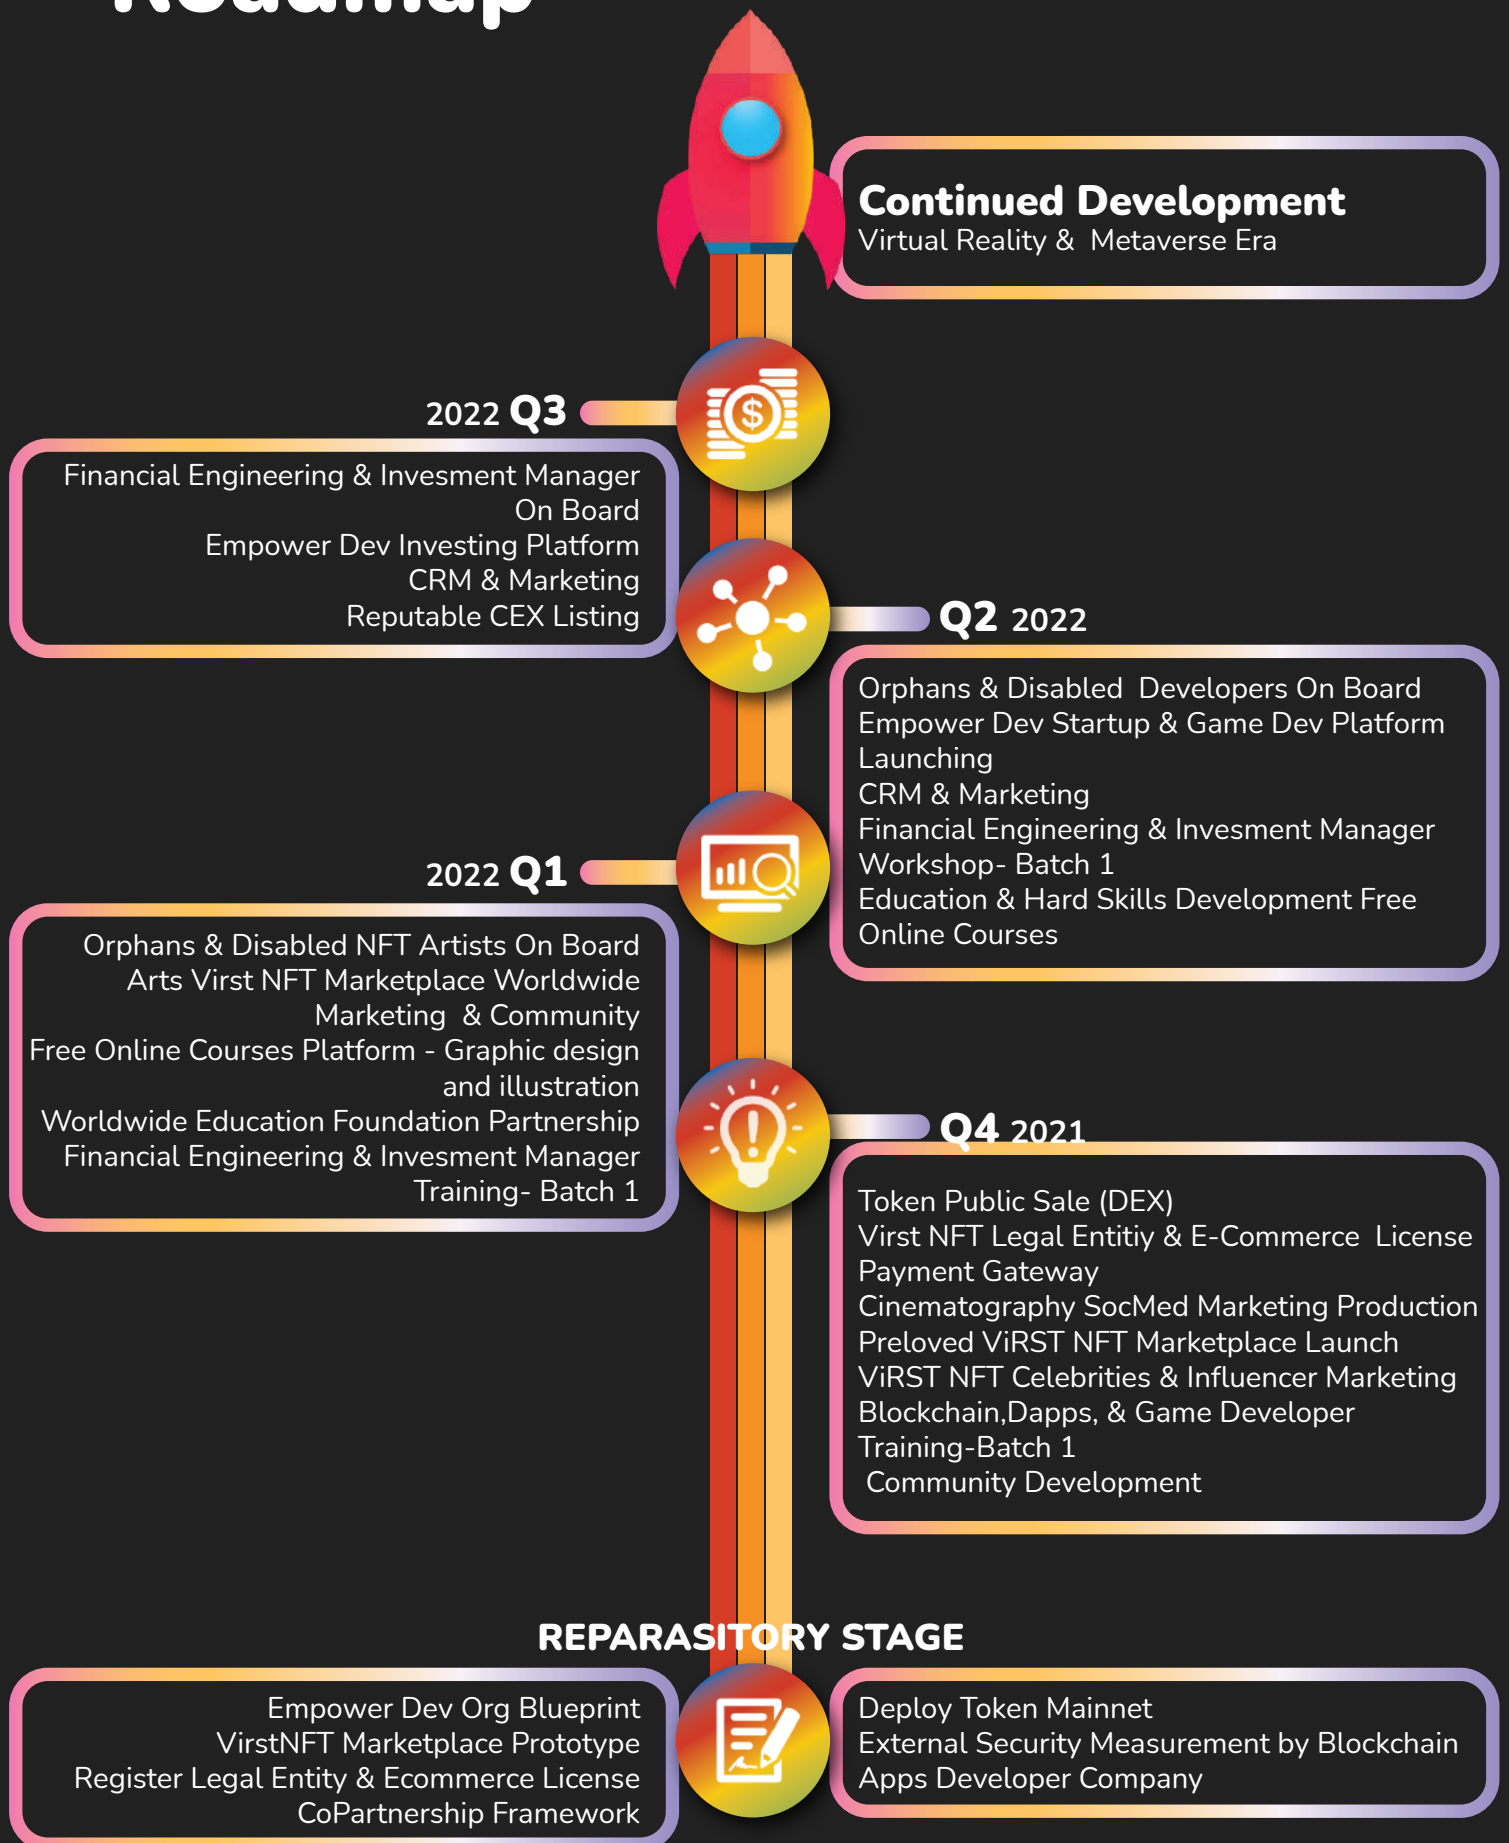

**Empower Investing**

# Roadmap

# Our Token

## Token Design

Our token is a deflationary utility token that decreases in total supply every time a token transfer happens. As with every transfer, 1% of the transferred amount will be burned. We work to develop more platforms for the utility of our token. We raise up the next level orphans & disabled developers with Blockchain, Dapps, Game, Tech Entrepreneurship and Investing training programs. With decreased total supply and increasing demand by more platforms to come, our token price is theoretically continuous higher.

## Token Security

We take security seriously. We are currently doing an external Security Measurement by Blockchain Apps Developer Company to ensure that our smart contracts on the blockchain are not susceptible to any attacks and hacks.

# Our Token Utility

## **Preloved Stuff NFT Marketplace (First NFT)**

Celebrity / Public Figure preloved stuff donation. The revenue generated will use to provide education and hard skills development for orphans and the disabled

## **Arts NFT Marketplace (Virst NFT)**

Exclusive Arts NFT marketplace by talented orphans and the disabled artists.

## **Startup Platforms**

Startup & game platforms by orphans and the disabled developers.

## **Investing Platform**

Investing platform managed by orphans and the disabled with a proven 'copy & paste' technical & fundamental analysis system.

# Tokenomic

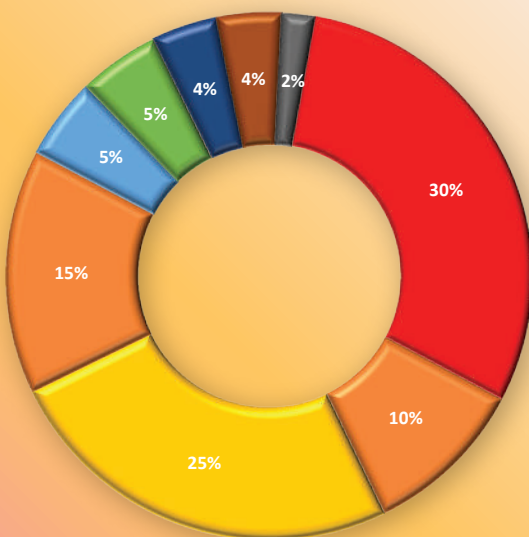

Although our multi-platforms offer great utility for our token, we value our investors by Reflection, Liquidity Pool Acquisition Lock, and Burns.

## Transaction

- 2% Reflection to holder
- 1% Burn
- 2% Liquidity pool
- Liquidity Pool Locked 1 Years

## Supply 1 Trillion

- Burn 30%
- Private Sale 10%
- Presale 25%
- Pancake Swap 15%
- Endowment Fund 5%
- Founder 5%
- Marketing 4%
- Project Development 4%
- CEX 2%

- Endowment Fund Locked 1 year
- Founder vested gradually over 6 months

# Our Network

## ***Binance Smart Chain***

Binance Smart Chain (BSC) offers the same smart contract capabilities at much cheaper transaction fees and lightning-fast transaction speeds

## ***Pancake Swap***

PancakeSwap is the leading decentralized exchange with much lower transaction costs

## ***Blockchain App Developer***

Top 10 Blockchain Development Companies 2021, that provide high-security, increase traceability, enhance efficiency, & high-transparency

## ***Haistar***

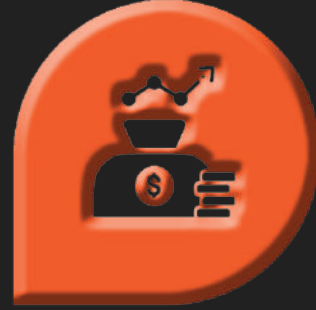

An e-logistics company equipped with experienced management team in the industry, integrated warehouse management system, and industry-standard business process and infrastructure

# SWOT Analytic

## Strength Analytics

- Our project is legit. ViRST NFT is applying a Legal Entity & E-commerce License.
- Safe Deflationary utility token with Liquidity Pool locked. Currently doing an external Security Measurement,
- Financially accountable, preloved ViRST NFT revenue audit by the public accountant
- Reputable Co Partnerships & Network

## Opportunity Analytics

- Our hard skills development program will raise up the next level Tech entrepreneurs, with new skilled resources, we can develop more blockchain startup in the real sector. That's our competitive advantage.

## Threat Analytics

- We are a pioneer in a specific NFT market. Our brand positioning is not in the common NFT marketplace, so we don't compete with the existing market leader. We own our particular market..

## Weakness Analytics

- Rome wasn't built in a day; we need time to create something significant step by step.
